| 4 needle 80/20 polycotton sweatband | 5 Panel structured
| Nylon mesh back panels | Poly snapback enclosure
| Pre-curved peak

**CAPS SOLD BLANK WITH SA SUBLIMATED FLAG (CHOOSE YOUR CUSTOM EMBROIDERY)

FLAT EMBROIDERY

Our most popular branding option!

Flat Embroidery entails stitching your logo and/or design onto the headwear.

This option allows for a vast number of colour variations, with the ability for logos & designs to be easily translated on a variety of different surfaces.

We use a high-thread count to ensure that you are left with a smooth and detailed finish.

Flat Embroidery can be combined with several other branding options. Request a combo of 3D Embroidery, PU Print, Applique, Flocking, Screen Print etc.

3D EMBROIDERY

Raise your designs into 3-dimensional!

3D Embroidery is achieved by placing foam under the top stitch, which raises the embroidered design. This results in a premium finish, that is smooth and precise, while adding an extra "pop" to your design.

For extra effect, combine **3D Embroidery** with **Flat Embroidery** or **PU Print**, or **Sublimation** resulting in a product with a difference!

Our 100 embroidery heads allow us to achieve more than 12,000 to 15,000 embroideries a day!

PU & 3D PU PRINT

PU Print is the most affordable branding option!

It allows for highly detailed designs, whether large images or small text, with one or many colour options.

PU Print is achieved when your design is printed onto PU vinyl, then using heat it is pressed onto the headwear.

Place your design on an entire panel (CMT), or use it for small detail prints, to give the impression of a badge.

This print option is not only cost-effective but durable and provides an accurate, smooth finish that can be placed anywhere on the headwear.

D-Gel is a raised **3D PU Print**.

FLOCKING

Flocking is a unique heat transfer vinyl that gives your design an added dimension, given it's raised, soft, and textured suede/velvet feel.

From printable to cut-out, **Flocking** is cost-effective and can be heat transferred onto any headwear of your choice.

SUBLIMATION

STYLE CODE: B007/PB007

Sublimation is achieved when an image is fused into the polyester material to give a high quality and smooth look.

With an unlimited number of colours able to be used, your design can be printed anywhere on a CMT cap, visor and bucket hat, either specific areas or the *entire* headwear.

Your choices are endless!

You can also subliminate directly onto any headwear stock item that is white and is made up of 100% polyester or has a high content of polyester make up.

SCREEN PRINTING

The perfect option for bulk orders!

If your design has one or two colours, **Screen Printing** is the most cost-effective branding option.

It is the perfect alternative to PU Printing or Embroidery if you are on a tight budget.

Screen Printing can be placed anywhere on your headwear for an eye-catching product.

CHROME & GOLD STICKERS

Once the manufacturing process of your headwear is completed, the option of **Chrome & Gold Stickers** can be added and are often used to provide information about a specific cap when in-store.

These stickers have become a trending accessory for headwear, as well as a great solution for brand exposure, and awareness. They can be fully customisable.

APPLIQUES

Appliques incorporate various stitching techniques to provide your finished branding with more texture, resulting in a badge-like appearance.

This versatile method of branding is achieved by using a variety of different stitching techniques, giving your branding unique character.

SONIC WELD

The **Sonic/3D Weld** is a high quality soft and rigid material, which gives a 3D appearance. It is an environmentally friendly, non-PVC material with a maximum application of 5 colours.

These imported, highly effective details include: glossy, matte, glitter, gradation, neon colour, metallic colour, pearlized or reflective.

This type of applique can be heat transferred onto headwear and has a glue backing that can be weeded out. Very thin lettering is not advised.

LOCAL CMT & CUSTOM IMPORT

With the exchange rate being as vulnerable as it is, we have worked really hard to eliminate its influence on your business. To do this, we have invested in a **South African CMT**, housed within our Durban head office, allowing us to manufacture locally!

We can deliver a variety of products in no time:

- 220 Styles to choose from
- 3.5 Million products in stock
- Production line producing 4,000 to 5,000 caps, 1,700 to 2,000 bucket hats and 2,000 beanies per day
- CMT Lead times: Sampling 7 days
Fabric & Stock 15-20 days
Custom Dyed 35-45 days
- Unlimited customisation potential

If You Dream It, We'll Create It!

Along with an extensive headwear range, products of the highest quality and best prices, we are also proudly **"Made in South Africa"**.

We challenge any reseller to TEST our claim. Compare our product quality, prices and lead times and you will find yourself always ordering through us!

We also offer exclusive **Import** custom designed headwear to suit your needs.

JACQUARD BEANIES

This unique and specialised branding is taking the industry by storm!

With the ability to knit any logo, pattern or design into the beanie, the branding options are unlimited.

No **Jacquard Beanie** is too big or too small as we are able to manufacture for kids and adults.

Choose between 3 different styles for variety:

Skull, Cuffed or Slouchy.

Go 1 step further and incorporate additional design elements by adding tags and embroidery for that extra touch of detail!

DOMES MARKERS

Dome Markers are another option that provide a three-dimensional appearance to your design.

They have a thick, dome-shaped, clear ployutherane resin coating that is durable, permanent and doesn't show wear and tear.

10

REASONS

TO ORDER PROMO PRODUCTS

- 1 80% of consumers own between 1 and 10 promotional products
- 2 53% of these people will use a promotional product at least once a week
- 3 48% of consumers would like to receive promotional products more often
- 4 Consumers hang onto promotional products for an average of 6.6 months
- 5 63% of consumers pass along the promotional products they no longer wish to keep
- 6 53% of the time, promotional products create a more favourable impression of the advertiser
- 7 77% of consumers say a promotional products' usefulness is the number-one reason to keep it
- 8 Wearables are the top product category, followed by writing instruments, bags, calendars and drinkware
- 9 Adding a promotional product to the media mix increases the effectiveness of other media by up to 44%
- 10 Promotional products draw as many as 500% more referrals from satisfied customers than an appeal letter alone.

A person with long reddish-brown hair, wearing a grey knit beanie and a dark jacket with a fur-lined hood, is seen from the back, looking out over a vast, hazy mountain range. The scene is misty or foggy, with some evergreen trees visible in the lower right. A large blue semi-circle is on the right side of the image, containing the text 'COLD FORCE RANGE'.
